SUMMARY

Data-driven Computer Science graduate with experience turning operational and social data into clear, actionable insight. Comfortable across Excel, Power BI, SQL, and Python, with a track record of using data to improve processes, train others, and directly inform business decisions.

SKILLS

Technical: SQL, MS Excel (Power Query, Pivot Tables), Power BI, Python, Google Sheets, Google Forms, MS Office Suite

Analytical: Data Analysis, Data Visualization, Content/Marketing Performance Analysis, Reporting, Data Quality Review

Professional: Technical Training & Facilitation, Documentation, Communication, Problem Solving, Time Management

RELEVANT PROJECTS

Analytical Report on Employee Data — MS Excel, Power BI

- Performed exploratory data analysis (EDA) to identify trends, cleaned and transformed company dataset, and built interactive Excel and Power BI dashboards to communicate workforce insights.

Human Preference Analysis — MS Excel

- Analyzed survey data and identified trends using Power Query and Pivot Tables.

Deep Learning Diagnostic Tool for Ovarian Cancer — Python, CNN, YOLOv8

- Led model development and evaluation for a medical imaging classifier, managing data quality challenges and project timelines as team lead.
- Developed hands-on understanding of data integrity issues, model validation, and the criticality of dependable information for AI system design.

PROFESSIONAL EXPERIENCE

Speedlink Group (formerly Speedlink Hi-Tech Solutions Limited) | Port Harcourt

Network Operations Analyst (Service Delivery & Provisioning)

January 2026 - Present

- Maintain and analyze network inventory, topology documentation, and customer service records using Excel and Google Sheets, improving delivery-operations efficiency.
- Contribute data-informed input to planning discussions on network expansion and support service deployment from request through activation.

SQL Facilitator, Data Analytics Track — Speedlink Institute of Technology and Innovation (SITI)

June 2026 - Present

- Facilitate SQL training for data analytics trainees, starting with 65 in-person learners, adapting delivery as sessions moved partly virtual.
- Design structured lesson plans building practical, job-ready SQL querying skills.

Data Analyst Intern

June 2025 - December 2025

- Reviewed datasets and identified errors to improve data quality; carried out analysis in Excel to support reporting.
- Helped train IT students on basic data analysis concepts and tools.

Female Founders Circle (FFC) | Volunteer - Remote/Port Harcourt

Data Analyst (Volunteer)

April 2026 - Present

- Analyze content performance across LinkedIn, Facebook, TikTok, and Instagram to shape platform-specific content strategy.
- Insights directly informed planning for the FFC 2.0 Networking Cocktail (June 2026), which achieved a 95% premium-ticket conversion rate among paid attendees and an 8/10 overall event rating.

EDUCATION

BSc. Computer Science (Information Systems) - Babcock University, Ogun State, Nigeria

Jan 2021 - Jul 2024

CGPA: Second Class Upper Division (4.22/5.0).
